-  Orders
-  Search Order
-  Add To Stock
-  Search Stock
-  Incoming
-  Transfer
-  Change Prices
-  Stocktake
-  Stock Confirmation

Before you can order or sell a product, you must first add the details into the catalogue.

The catalogue is a list of all possible items you have available for sale, including non stock items such as Service, Labour and serialised products. You can also specify quantity you wish to hold in stock for each store.

Lets have a look at how a new product is added.
 We will go through adding several different products.

Simply click Stock, then Product Maintenance.

The supplier is not available in the list so we will add the new supplier.

In this case the supplier of the service is internal consultancy, so we will add our company name as the supplier.

Minimum recommended retail price is used in the Sales Representatives Commission reports.
If the sale of the item is below this price then sales reps do not receive commission.

Next, tick the Sell without entry in stock.

This means you do not hold physical stock of this item. So when a sale is made, the system does not check stock for availability.

Now we will add another non-stock item called **Credit Note**

The credit note is used when a customer returns goods and is given a credit to spend in store.

You must have an item called a Credit Note and tick the Credit Note check box at the bottom.

Lets add the item in.
