

Section : Stock
Sub-section : 2.80.000 - Stocktake

Target audience : Store Rep/Manager | **Stock Control** | Administrator | **Financial Controller** | Management
 Industry type : Generic

Welcome to ClickPOS Video Tutorials

The **Stocktake** module provides you with the facilities to reconcile the stock in the system against the physical stock within the store or department.

We recommend you perform the stocktake for each store at least once a month.

It is advisable to not perform the stocktake while the business is trading. If you must perform stocktake during trading hours, then keep a track of items you sold since the stocktake started. You can use the Log File to identify items sold since it includes Date and Time stamps of items sold.

Stocktake

This module provides the user with the facilities to reconcile the stock in the system with the physical stock. To perform a stocktake, you are required to take a "Snapshot" of the existing stock in the system, then count and enter all items into the system to produce a comparison report.

Create SnapShot - Perform Step 1 ☒

Click OK to create a snapshot copy of the physical stock in the system for the branch you are currently logged into.

Product Catalogue List ☒ Phone List ☒

Print a list of all the products in the system, to manually record the stock quantity. Then use the barcode on the list to scan in quantities when performing a physical stock count. You do not need to produce this list if you are using a portable scanner or if you are manually scanning the actual product barcode directly into the system.

The stocktake, is a simple 5 step process.

Step 1. Create snapshot.

As you click the OK button, the system creates a copy of Current Stock on hand for this store.

The snapshot is used in Step 4, to compare the system stock against a physical count.

Please note that if you are trading while performing stock take, then as of this point you need to track all items sold so you can include the barcode as if it was in stock.

Add Stock Count

Stocktake ID 42 All

Use this screen to perform a physical stock count in the system. You have two options of adding a physical stock quantity. You may use one or both while stocktaking.

Scan by Quantity

You may specify the quantity then scan the barcode. You may also use this option to scan the same item many times given the quantity is 1.
Eg. Scan the same barcode 5 times with quantity 1.

Quantity:

Barcode:

OK ☒

Scan Each Barcode

Use this option for scanning each product more than once. In this option you cannot specify a quantity as it is defaulted to 1. You must **SCAN ALL ITEMS**, useful for those that use a portable scanner to scan all items on the shelves, or copy and paste all barcodes taken from a portable scanner.

Before you scan the item, you can change the **Quantity** to enter or scan each item individually.

Please remember by default, all scanners perform carriage return, this means the OK is clicked automatically so you can scan quickly one after another.

If this does not happen, click the OK button after each scan, or use the next option of scanning.

To change the scanner settings to factory default, please refer to the scanners manual.

To start scanning for stocktake, Open **Microsoft WordPad** on your portable scanner

Start Scanning barcodes on the products.

Please note, to scan ALL items.

For example, if you have 5 items of same barcode, then scan 5 times. You should see the same barcode repeated 5 times.

For serialised items, just scan each item once. For Mobile phone industry, scan IMEI for phones.

Once all items are scanned,
Copy the file to your PC.

Stocktake

This module provides the user with the facilities to reconcile the stock in the system with the physical stock. To perform a stocktake, you are required to take a "Snapshot" of the existing stock in the system, then count and enter all items into the system to produce a comparison report.

SnapShot Created - Perform Step 2

A snapshot has been performed for this store today. Now you may add the physical stock count into the system by clicking OK under Step 2. If you require cancelling the existing snapshot and starting a new snapshot, you must first delete the snapshot created today.

Product Catalogue List

Phone List

Print a list of all the products in the system, to manually record the stock quantity. Then use the barcode on the list to scan in quantities when performing a physical stock count. You do not need to produce this list if you are using a portable scanner or if you are manually scanning the actual product barcode directly into the system.

Step 4. Compare Report.

ClickPOS Online - Windows Internet Explorer

http://216.14.207.186/psctestnet/Stock/PsStockTakeSTRReport.aspx?ControlID=42

Stocktake - Comparison Report

This report displays the variance between the system and the physical stock count. Use this report to identify the differences, and then manually adjust stock levels for this branch.

- If the Variance column displays "Blank" then the system count matches the physical count. ACTION: None
- If the Variance column displays a "Negative Value" (Red), then the physical count is less than the system count. ACTION: You must delete excess stock.
- If the Variance column displays a "Positive Value" (Blue), then the physical count is more than the system count. ACTION: Add quantity displayed into the system for this branch.
