

Section : System Administration

Sub-section : 5.10.000 Tariff Plan Overview

Target audience : Store Rep/Manager | **Stock Control** | **Administrator** | **Financial Controller** | Management
 Industry type : Mobile telephone industry

**Welcome to ClickPOS
 Video Tutorials**

The **Tariff Plan** is specifically designed for the mobile telephone industry. This section has powerful functions to manage your handsets, plans and expected carrier remunerations.

The primary usage is to add **new phones** and **plans**, then assign the **expected carrier payments**.

The Plan Template is made up of Carrier, Plan and Phone tabs. You are required to build and maintain all three tabs, then join them together in the Plan Template along with expected revenue.

For example, if a new handset is on the market, you first need to add the Phone in through the Phone Tab, then go into the Plan Template tab to specify what plans can be sold with that handset.

In this overview, we will have a look at some examples already built into the system. Add plans and handsets, then build the plan template for the new items added.

Now, lets add a carrier name AT&T

Current Carriers

☐ Carrier Name	Network Type	AccountRef	Rep Comm %	Include in debtor	Date Created	Date Modified

The **Account reference** is the name that is specified as the Debtor in your financial system. In this case AT&T will pay us commission for contract sales, therefore we want to extract any commission into the specified account name.

This name should be exactly the same as the name specified in your Financial System.

OK ☒ Clear ☐Next, build the **Plans**.

The plan names must be unique for each entry. There are two ways of naming a plan. **User defined** and the **Wizard** which creates the plan names automatically. You may use one or both options to manage your list of plan names.

User Defined is a custom text entry method, lets look at an example.

As you can see, the references depict the Plan name entry.
Let's save this plan name.
Now repeat the entry for all other combinations of plans. This means any change of value or months need to be entered one by one.

Air time minimum %

5

OK

The **Airtime percentage** is the carrier revenue amount that you will be paid for the customers usage. The percentage is based on the **Value** of the contract.

Nominate the percentage that you expect as the revenue. You can report on the minimum expected airtime through the **"Value of Airtime 3.19.2"** report.

Lets look at the Copy Details options.

If you have already built Plan Templates & Carrier Commission structures for other handsets, and the new handset revenue is the same as the existing model, then you may copy the Plan Template from the existing handset.

Example, the plans that can be sold with the new N999 handset and the revenue from carrier are exactly the same as the N96. So rather than building the Plan Template, simply copy.

Now we can enter the **expected carrier revenue** in the **Plan Template**.

When a new plan is sold, the expected commission is automatically applied to the Plan sale.

As a result, gross profit is calculated instantly

Lets add the plans we created earlier.

To apply revenue, you are required to first use the 'Add New' option by selecting Carrier, Plan and Phone.

That saved. Once you complete all combinations of Plans and handsets, you can **search** and view the details. You can also use the search each time the carrier makes changes to the commission structure, you can search and make the adjustments to the commission in this Plan Template.

Please note that if you have a Price change schedule, you need to make the change on the day the new structure is applied. If you are unable to apply the new schedule, then you may use the Reconcile Revenue to apply the new revenue details. Please refer to Reconcile Revenue video tutorial.
